DESCRIPTION	Integrates lightweight air-cell technology for superior pressure relief and dynamic support. Its dual-compartment air bladder ensures stability and is ideal for active users.	A lightweight, low profile, foam cushion with mild contouring, designed for basic positioning and pressure relief. Features hexagonal foam shapes for reduced surface tension and a water-resistant, stretchable cover for improved immersion and comfort.	Self-adjusting air-foam cushion providing reliable comfort and some pressure relief with no manual adjustments.	Dual-density foam cushion focused on positioning and moderate pressure redistribution. It includes leg troughs, a stable base, and a durable cover, ensuring user stability and comfort.	Supports pelvic stability and reduces pressure on bony prominences using viscoelastic foam. It offers mild to moderate postural support, airflow-enhancing fabric, and effective skin protection.	Pressure-relief cushion for active users. Combines a contoured foam front for steady transfers with rear SmartCell compartments for skin protection and stability.	Combines air-foam technology and multi-density foam for advanced immersion, pressure relief, and positioning. Includes breathable or water-resistant covers.

DESCRIPTION	Combines viscoelastic foam with a contoured base for premium skin protection and immersion. It reduces tissue load, enhances stability, and features a surface-tension-reducing stretch cover. Often considered the most comfortable option.	Combines foam and a Hydrolite fluid bladder for advanced skin protection, pressure redistribution, and positioning. It maximises envelopment, stability, and immersion with reduced weight and temperature sensitivity.	Stable, breathable, ultra-light cushion with air-filled SmartCells in nine compartments to offload ITs/coccyx and improve pelvic stability.	Uses a self-adjusting fluid insert for excellent pressure relief and skin protection. It automatically adapts to the user's weight and shape, offering easy maintenance and optimal comfort.	Adds advanced positioning to the AS model with a more contoured foam base and fluid insert. It enhances pelvic stability, skin protection, and postural alignment for users with complex needs.	Highly adjustable cushion with five SmartCell compartments to accommodate asymmetry, manage obliquity, and redistribute pressure.	Promotes optimal posture and pressure redistribution, ideal for users with complex positioning needs.
