- Double brakes with additional parking lock
- Includes a seat and backrest to allow the user to rest during use
- Walking stick holder and Storage Bag for convenience
- Large diameter high-grip wheels to cope with a range of floor surfaces

4 Wheel Folding Forearm Rollator

Product Description

A lightweight rollator to help users who have difficulty or lack confidence when walking. This rollator also has forearm supports to help users that may have limited grip strength or upper body dexterity. A foam-covered backrest and a seat allow use of the rollator as a chair. The backrest fits using button-clips and is key to adding stability when assembled, but easily disconnects to allow folding the rollator for storage. The lockable brakes act on the rear wheels. Simple button-clips and handwheels allow the user to adjust the height of the forearm supports and distance to handles. The rollator has a walking stick clip and holder to one side and a detachable Storage Bag to the front to help the user to easily transport lightweight objects. The large diameter high-grip wheels allow the rollator to roll along most surfaces while keeping control.

Note: We recommend that a healthcare professional assesses a user before they buy and use this product.
