

NEW!

Grooved Mushroom Joystick Handle

A revolutionary new joystick handle, the Grooved Mushroom takes the best features of several previous Bodypoint® models and advances them to the next level. Its hand-filling shape, top and side grooves, and height-adaptability make it ultra versatile to meet a wide range of user needs.

Top and side grooves give superior grip and control with limited hand function.

Perfect height for upright gripping, yet easily trimmed shorter for palmar hand position or fingertip control. (See cutting instructions below.)

Springy and tough polyurethane is safe (non-cytotoxic), easy to grip, and a breeze to clean by hand or in dishwasher.

Textured, rounded top is comfortable and secure for users grasping from above.

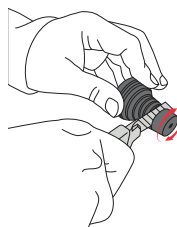

Grooved shaft and ability to tuck fingers below the knob make driving easy for users grasping from the side.

Flexible shaft dampens vibration in driving and reduces risk of damage to electronic controls.

Part Numbers

PC110A	For 4.8 mm (3/16") stem size
PC110B	For 6.4 mm (1/4") stem size

Easily cut to desired height with a utility knife

60 mm
(2-3/8")

28 mm
(1-1/8")
