

# upsee

"This product is absolutely amazing! It provides the support she needs in her core area and improved her head control. We haven't seen progress like this in a very, very long time. It's incredible."

**Amy Bowns**

## For children with motor impairments, the Upsee opens an unexplored world.

It lets them stand and walk for the first time with an adult's help. And it's changing lives.

Some kids kick a ball to their little brother for the first time. Or take their first stroll to the park. And some play hand-in-hand with their best buddy for the first time ever. Each little step means the world.

Leading therapists endorse Upsee because it lets children take part right now, and creates real possibility for development in future, by motivating movement and weight-bearing.

### A Mother's Invention...

Debby Elnantan invented the Upsee as a walking aid for her two-year-old son Rotem, who has cerebral palsy. She later brought her invention to Firefly for help with design and development, and now the Upsee is helping children around the world.

### The Upsee is made up of three parts:

- 1 Adult Hip-Belt**  
One standard size (Black, adjustable)
- 2 Child Harness**  
XS (Purple or Green)  
S, M, L (Blue or Pink)
- 3 Sandal (Standard & Infant)**  
(The infant sandal are suitable for the XS harness only) The patented design is stylish, durable and easy to clean, too.

1 Adult Hip-Belt

2 Child Harness

3 Shared Sandals

## Technical
